Volume 89 (1993)

PHYSIOLOGY AND BIOCHEMISTRY

Photosynthetic changes in soybean with and without nitrogen and increased carbon dioxide
by Y. Li and G. Gupta (Princess Anne, MD) 1–4

Isolation and characterization of calmodulin and a novel calcium-binding protein calpollenin from *Pinus yunnanensis* pollen
by M. Gong, Z-H. Yang and T.H. Tsao (Beijing, China) 5–12

Protein-kinases and $p34^{cdc2}$-like protein in root meristems of *Pisum sativum* during germination
by D. Chiatante, M. Crosti, P. Brusa, A.J. Trewavas and P.C.L. John (Cempobasso and Milan, Italy; Edinburgh, UK; Canberra City, Australia) 13–21

Genetic variants of the trypsin inhibitor from barley endosperm show different inhibitory activities
by M.A. Moralejo, G. García-Casado, R. Sánchez-Monge, C. Lopez-Otín, I. Romagosa, J.L. Molina-Cano and G. Salcedo (Lleida, Madrid and Oviedo, Spain) 23–29

GENETICS AND MOLECULAR BIOLOGY

Evidence of meiosis-specific regulation of gene expression in lily microsporocytes
S. Tabata, S. Sato, Y. Watanabe, M. Yamamoto and Y. Hotta (Nagoya and Tokyo, Japan) 31–41

Expression of a Cecropin B lytic peptide analog in transgenic tobacco confers enhanced resistance to bacterial wilt caused by *Pseudomonas solanacearum*
by J.M. Jaynes, P. Nagpala, L. Destéfano-Beltrán, J.H. Huang, J. Kim, T. Denny and S. Cetiner (Baton Rouge, LA; Athens, GA; Adana, Turkey) 43–53

Isolation and characterization of cDNA sequences controlled by inorganic phosphate in *Chlamydomonas reinhardtii*
by F. Dumont, B. Joris, A. Gumusboga, M. Bruyninx and R. Loppes (Liège, Belgium) 55–67

The phenotypic characterisation of R_2 generation transgenic rice plants under field conditions
by W. Schuh, M.R. Nelson, D.M. Bigelow, T.V. Orum, C.E. Orth, P.T. Lynch, P.S. Eyles, N.W. Blackhall, J. Jones, E.C. Cocking and M.R. Davey (University Park, PA; Tucson, AZ; Nottingham, UK) 69–79

CELL AND TISSUE STUDIES IN VITRO

Cation cotolerance in callus cultures of *Medicago sativa* L. tolerant to sodium chloride
S.H. Shah, S.J. Wainwright and M.J. Merrett (Swansea, UK) 81–84

Developmental electron microscopy and histochemistry of somatic embryo differentiation in sugarcane
by E.A. Brisibe, D. Nishioka, H. Miyake, T. Taniguchi and E. Maeda (Nagoya, Japan) 85–92

Regulation of transformation efficiency of peanut (*Arachis hypogaea* L.) explants by *Agrobacterium tumefaciens*
by E.A. Mansur, C. Lacorte, V.G. de Freitas, D.E. de Oliveira, B. Timmerman and A.R. Cordeiro (Rio de Janeiro, Brazil) 93–99

Osmotic versus nutritional effects when rooting in vitro asparagus minicrowns on high sucrose media
by A.J. Conner and P.G. Falloon (Christchurch, New Zealand) 101–106

Direct somatic embryogenesis and plant regeneration from immature embryos of chilli (*Capsicum annuum* L.)
by I. Harini and G.L. Sita (Bangalore, India) 107–112

GENERAL

Restricted virus multiplication and movement of tomato mosaic virus in resistant tomato somaclones
by S. Schiller Smith and H.H. Murakishi (East Lansing, MI) 113–122

Book Reviews 123–125

PHYSIOLOGY AND BIOCHEMISTRY

Hydroxynitrile lyase from *Sorghum bicolor*: a glycoprotein heterotetramer
by H. Wajant and K.-W. Mundry (Stuttgart, Germany) 127–133

Changes in polypeptides in *Pharbitis* cotyledons during the first flower-inductive photoperiod
by M. Ono, K.S. Ono, M. Yasui, M. Okasaki and H. Harada (Nagano and Ibaraki, Japan) 135–145

Phosphoglycerate mutase activity and mRNA levels during germination of maize embryos
by X. Grañna, C. Broceño, J. Garriga, P. Pérez de la Ossa and F. Climent (Barcelona, Spain) 147–151

Plasma membrane sterols and flowering induction
by P. Crespi, C. Penel, M. Crèvecoeur and H. Greppin (Genève, Switzerland) 153–160

Wyerone derivatives and activities of peroxidase and polyphenoloxidase in faba bean leaves as induced by chocolate spot disease
by A.M. Tarrad, Y.Y. El-Hyatemy and S.A. Omar (Giza, Egypt) 161–165

Purification and characterization of poly(A) polymerase from germinated wheat embryos: enzyme glycosylation
by R. Kapoor, N. Verma, D. Saluja, S. Lakhani and R.C. Sachar (Delhi, India) 167–176

GENETICS AND MOLECULAR BIOLOGY

Replication-independent *cis*-acting element of a maize histone gene promoter
by M. Lepetit, M. Ehling, R. Atanassova, N. Chaubet and C. Gigot (Strasbourg, France) 177–184

Recovery of transgenic chrysanthemum (*Dendranthema grandiflora* Tzvelev) after hygromycin resistance selection
by J.P. Renou, P. Brochard and R. Jalouzot (Angers and Trémentines, France) 185–197

CELL AND TISSUE STUDIES IN VITRO

PEG mediated DNA uptake and transient GUS expression in carrot, rapeseed and soybean protoplasts
by J.O. Rasmussen and O.S. Rasmussen (Aarhus, Denmark) 199–207

The toxicity of antibiotics to protoplast cultures of *Triticum aestivum* L.
by J.A. Simmonds and J.L. Grainger (Ottawa, Canada) 209–214

A methotrexate-resistant line of *Daucus carota* with high levels of intracellular folates
by P. Crosti, M. Malerba and R. Bianchetti (Milan, Italy) 215–220

GENERAL

Photoacoustic measurements of photosynthetic activities in intact leaves under copper stress
by G. Ouzounidou, R. Lannoye and S. Karataglis (Brussels, Belgium; Thessaloniki, Greece) 221–226

Subject Index Volume 89 (1993) 227–229
